

Direct Debit TELESET™ of Postage Funds

You Won't Miss A Beat With Direct Debit TELESET!

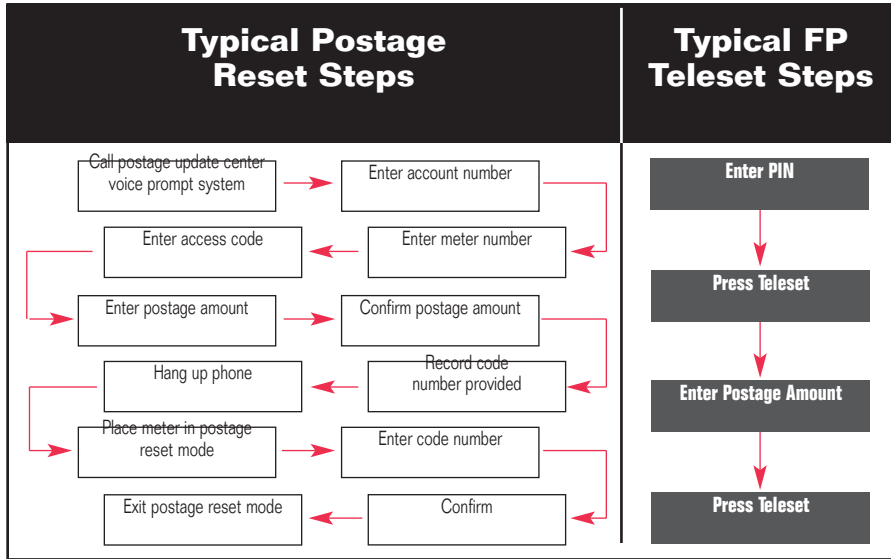

Direct Debit TELESET is the easiest and fastest way to ensure that your FP mailing system is always ready when you need it. TELESET is the postage resetting system developed by FP that utilizes direct modem communication from your FP postage meter to our secure processing center. Most busy offices don't always have the time to plan ahead to ensure that postage funds are always available when needed. And those rush mailing jobs usually don't happen between 9 and 5.

No matter. Simply push a few buttons on your FP meter and your system will connect with FP's TELESET Data Center (TDC) to reset itself with postage. In the background, transparent to the operator, FP coordinates a direct debit from your business bank account to the United States Postal Service. The TDC is FP's state-of-the-art postage resetting facility developed to meet the requirements of the USPS and the demands of our customers.

Direct Debit TELESET™

Not only is Direct Debit TELESET fast and easy, it's very secure. This process meets all requirements of the USPS and complies with US banking laws to keep your funds and postage safe and available only to you.

This makes it simple. When an important mailing needs to get out, and it's 8:00 PM on a Friday, would you rather wait until Monday or finish it now? FP's Direct Debit TELESET lets you finish the job now. At no time will FP debit your account for any amount not authorized by your postage meter.

Benefits

- ✓ Fast—No more paying in advance and waiting for checks to be cleared
- ✓ Easy—Simply push a few buttons and you're done
- ✓ Reliable—Fully automated system
- ✓ Safe—An electronic banking transaction governed by banking laws and the USPS
- ✓ Productive—Add postage when you run out—immediately
